12 February 1986

MEMORANDUM FOR: Director of Central Intelligence

FROM:

SIG-I Working Group Chairman

25X1

SUBJECT: Interim Report (Section 402, Intelligence Authorization Act for FY 1986)

1. You proposed to John Poindexter a method for dealing with subject requirement and received his concurrence. Pursuant thereto, I forward, for your signature, letters to Messrs Durenberger and Hamilton transmitting the "interim report."

2. There are three enclosures to the letters:

- Enclosure 1 is a compilation of what has been done over the past twelve months to enhance the national counterintelligence and security posture. It is not an all-inclusive list, but nonetheless impressive. The Working Group met to review the content yesterday, and all members signed off.
- Enclosure 2 is a heavily caveated list of legislative proposals afoot within the administration, and constitutes a partial reply to the minority members of the HPSCI who had written to Poindexter on the subject. They won't find our list entirely satisfactory, but it's the best I could negotiate with OMB (Donahue); John may be able to clear a fuller response when he gets around to answering their letter.
- Enclosure 3 is the commentary on the first half of the SSCI draft revised to reflect the changes agreed to at the last SIG-I meeting.

2. I recommend you sign both letters for hand delivery to the respective Chairmen.
